Environmental Policy and Objectives

The Environment as Our Strategic Choice

Cleverlab srl (https://www.cleverlab.it/) has made the strategic choice to adopt an Environmental Management System in accordance with the ISO 14001 standard and have it certified by an independent body.
This reflects the specific business context in which our Company operates, namely IT services and solutions.

Our Environmental Objectives

Through its ISO 14001 Environmental Management System, the Company undertakes to define, review and pursue objectives aimed at:

1. Promoting the sustainable use of resources, with a particular focus on the energy efficiency of IT infrastructure and offices, integrating these targets into broader ESG sustainability objectives;
2. Protecting the environment and preventing pollution by ensuring rigorous and responsible management of waste electrical and electronic equipment (WEEE) and office waste;
3. Mitigating and managing climate change impacts by optimising logistics processes and encouraging flexible and sustainable working arrangements;
4. Ensuring full compliance with environmental laws and regulations.

These overarching strategic objectives translate into measurable targets for the various business processes and individual organisational areas, which are continuously monitored by Management.

Our Commitment to Environmental Compliance

The Company undertakes to ensure full compliance with all legal and other requirements applicable to its site, processes and services. This commitment is fulfilled through:

- Compliance with applicable laws and regulations, including the requirements of Italian Legislative Decree 231/01, in line with the principles set out in its Code of Ethics;
- Meeting customer contractual requirements concerning the environment and sustainability, working in an integrated manner with the ISO 9001 Quality Management System;
- Strict compliance with the requirements of the ISO 14001 standard.

Our Commitment to Continual Environmental Improvement

Recognising that environmental protection is a dynamic process, the Company systematically commits to improving its Environmental Management System and enhancing its overall performance. To this end, we continually identify and make the most of opportunities for improvement, actively involving our employees, suppliers and partners in this journey towards responsibility and sustainability.
